

ComLink ST^{3G}

DEVICE SPECIFICATIONS

- ▲ DIMENSIONS: 8.5"H x 11.0"W x 2.2"D
- ▲ WEIGHT: 3.9 LBS. , 4.4 LBS. WITH HOT SWAP BATTERY
- ▲ DISPLAY: 10.4" SUPER SHARP 1024 x 768
- ▲ PROCESSOR: INTEL® ATOM™ Z530, 1.6 GHz
- ▲ MEMORY: 1 GB OF RAM MEMORY
- ▲ STORAGE: 32 GB SOLID STATE DRIVE
- ▲ OPERATING SYSTEM: WINDOWS XP PRO TABLET®
- ▲ BATTERY TYPE: LI-ION INTERNAL PLUS EXTERNAL LI-ION HOT SWAP BATTERY
- ▲ PORTS: USB PORTS (3), AUDITORY PROMPT SPEAKER PORT, MIC AND HEAD PHONE JACKS
- ▲ REMOVABLE FLIP-UP SCREEN PROTECTOR

COMLINK ST^{3G} STANDARD CONFIGURATION

INCLUDES

- ▲ THE GRID 2 COMMUNICATION SOFTWARE WITH SYMBOLSTIX SYMBOLS (TOBII COMMUNICATOR WITH SYMBOLSTIX SYMBOLS AVAILABLE AS AN OPTION)
- ▲ HUGE LIBRARY OF PRE-BUILT PAGE SETS
- ▲ HOT SWAP BATTERY
- ▲ USB EXTERNAL KEYBOARD
- ▲ WIRELESS LASER MOUSE
- ▲ FRS FLEXABLE™ INFINITELY ADJUSTABLE HANDLE AND STAND
- ▲ BUILT-IN GEWA® ECU FOR TV, PHONE, STEREO CONTROL AND LIGHTING CONTROL
- ▲ BUILT-IN WI-FI 802.11 A/B/G/N AND BLUETOOTH 2.0 WIRELESS
- ▲ SINGLE AND DUAL SWITCH SCANNING INPUT PROVIDED AT NO CHARGE
- ▲ FRS REMOTE HELP DESK FEATURE

What Makes the ComLink ST^{3G} "Better By Design"?

FRS FLEXABLE™ STAND

The patent pending FRS FlexABLE™ Stand allows you to optimize visibility and reduce screen glare induced by overhead lighting. Unlike competitive fixed-position designs, our FlexABLE™ Stand provides infinite adjustment for precise, glare-free positioning. Competitive designs using fixed prop legs create rigid obstructions that can be harmful for spastic users who unintentionally contact the device. Our revolutionary FlexABLE™ Stand eliminates this danger by allowing the device to deflect upon impact, making it a soft and safe, positioning solution.

FRS FLEXABLE™ HANDLE

The patent pending FRS FlexABLE Handle is exceptionally easy to grip even for those with very limited dexterity, providing a new level of independence for many users.

PRODUCT TOUR

The intuitive, easy-to-navigate Product Tour lets you take a "test drive" of the extensive array of pre-built page sets and ComLink ST^{3G} capabilities at anytime.

HANDWRITING RECOGNITION

For those who prefer to use their own handwriting to communicate, our powerful Handwriting Recognition feature and accompanying page set integrates seamlessly with word prediction for fast, effective communication.

DUAL AMPLIFIED SPEAKERS

We have engineered the Dual Amplified Speakers to provide exceptionally loud and clear voice output with a rich high quality tone that will not break up at high volume levels like many others do.

PROTECTIVE RUBBER BUMPER GUARDS

The integrated Protective Rubber "Bumper" Guards absorb shock and help protect the device in the "Real World" environment.

HOT SWAP BATTERY

The easy access Hot Swap Battery can be swapped out for additional runtime without turning off the ComLink ST^{3G}. This unique design provides a fast and convenient way to add extra battery runtime without adding unwanted weight and bulk to the ComLink ST^{3G}.

INDUSTRIALIZED CONSTRUCTION

The Industrialized Construction of the ST^{3G} utilizes strong magnesium-aluminum case materials together with high impact ABS to provide exceptional durability and ruggedness.

COMPREHENSIVE VIDEO TRAINING TUTORIALS

All devices ship with our latest FRS Video Training Tutorials preloaded and free of charge. This means you can quickly become an expert user, while learning at your own pace, without the need for reading lengthy manuals or attending inconvenient training seminars.

FRS REMOTE HELP DESK

The built-in FRS Remote Help Desk feature allows our skilled technical support team members to take control of your device remotely to solve technical issues, upload and download files or page sets or just show you how to perform a programming function right on your device.

AUTOMATIC USER FILES BACKUP SYSTEM

The ComLink ST^{3G} Automatic User Files Backup system protects critical files from accidental deletion or changes. Best of all, it is performed automatically.
